

Fall 2023

CLINICAL AND TRANSLATIONAL RESEARCH SEMINAR SERIES

The **Advance RI-CTR Clinical and Translational Research Seminar Series** showcases clinical and translational research from across Rhode Island. This series features the best of both worlds: outstanding science from expert investigators across the translational spectrum, alternating with Advance RI-CTR's Pilot Projects Awardees presenting their early research. Seminars are held virtually **September-May**, on the **second Thursday of each month**, from noon to 1pm ET.

9/14 | Caroline Richardson, MD
"New Approaches to Type 2 Diabetes"

11/09 | Jonathan Kurtis, MD, PhD
"Novel Drugs for Care of Severe Malaria"

01/11 | Alan Rothman, MD
"Risk Factors for Dengue Virus Infection and Disease"

10/12 | William Goedel, PhD
"Administrative Data Linkage to Understand Occupational Patterns in COVID-19 Vaccines in Rhode Island's Workforce"

10/12 | Nicole James, PhD
"Unraveling the Unique Ovarian Tumor Immune Microenvironment to Uncover Novel Prognostic and Therapeutic Targets in High Grade Serous Ovarian Cancer"

12/14 | Mollie Ruben, PhD
"Race and Gender in Pain Assessment: Beyond the Binary Patient and Beyond the White Perceiver"

12/14 | Dan Spade, PhD
"Sperm RNAs in Reproductive Health and Toxicity"
