PROPOSAL SUBMISSION DEADLINES AND AWARD ANNOUNCEMENTS

Preliminary Application

Interested applicants are **required to submit a Preliminary Application** through the [UFunds online portal](#) no later than **Tuesday, September 14, 2021 at 5pm ET**.

Non-Brown faculty must request access to UFunds. Non-Brown faculty should email AdvanceRI@brown.edu by August 31, 2021 to request access to UFunds in order to submit an application. **Only users with a valid Google account can be given access to UFunds**

Invitations to submit a full proposal will be announced on or around **Monday, October 4, 2021**.

Resources and guidance for preparing a successful Preliminary Application are available on the [Advance-CTR website](#).

Full Proposal

Invited full proposals must be submitted no later than **Monday, November 8, 2021 at 5pm ET** through the [UFunds portal](#).

Pilot Project award announcements are anticipated to be communicated by email to applicants on or around **Tuesday, February 1, 2022**.

Individuals from historically underrepresented groups are encouraged to apply.

AWARD CATEGORIES & ELIGIBILITY REQUIREMENTS

Category 1

To be eligible for a Pilot Project award at \$37,500:

1. Applicants must possess health-professional or research doctoral degrees and hold a faculty appointment.
2. The Contact PI **must** hold a faculty appointment as *Instructor or Assistant Professor* (or equivalent) with a degree-granting institution in Rhode Island at the time the Pilot Project award commences. More senior faculty who are transitioning to a clinical or translational research focus or who are entering a new area of clinical or translational research can also serve as the Contact PI.

- a. When a single PD/PI is designated, that individual is not required to be an employee of the applicant organization. However, because the grant, if awarded, is made to the organization, the applicant organization must have a formal written agreement with the PD/PI that specifies an official relationship between the parties even if the relationship does not involve a salary or other form of remuneration. If the PD/PI is not an employee of the applicant organization, we will assess whether the arrangement will result in the organization being able to fulfill its responsibilities under the grant, if awarded
 - b. Postdoctoral fellows or residential physician applicants must submit a letter from their Department Chair(s) stating that the applicant will have a faculty appointment by January 3, 2022, if awarded (not required for current faculty).
3. Mentor(s) should be designated who are faculty at an Advance-CTR affiliated health care system (Lifespan, Care New England, VA Providence) or a degree-granting institution in Rhode Island. Mentor(s) should be researchers in the field related to the proposed project, have experience and demonstrated success as research supervisors, and be faculty at the *Associate Professor* level or above. Projects may have more than one mentor, such as one who is an expert in the content of the proposed research and another who is an expert in the proposed methodology (e.g., statistics, epidemiology, informatics, etc.).
4. The Contact PI cannot be receiving or have previously received external funding in the role of a PI or co-PI from a R01 or equivalent (e.g., VA Merit Review or NSF grant). Note that Contact PIs with Foundation or Mentored grants are eligible.*
5. A PI cannot hold funding from a COBRE project or another IDeA mechanism of support at the same time as Advance-CTR Pilot Project funding.
6. The proposed Advance-CTR Pilot Project should not have significant scientific or budgetary overlap with another funded project.

Faculty who have served as PI or co-PI on a prior R01 or equivalent are eligible to serve as Contact PI if proposing a pilot project that is in a **new area of clinical or translational research.*

Category 2

To be eligible for a Pilot Project award at \$75,000, projects **must meet all eligibility requirements above** and also:

- Be led by two or more Principal Investigators (Multi-PI) from different disciplines or training backgrounds. A Contact PI must be designated. Partnerships from different departments or institutions are encouraged. Trans-institutional collaborations among faculty at Brown University, University of Rhode Island, Rhode Island healthcare institutions, or other degree-granting institutions in Rhode Island are highly encouraged. Multi-PI's can be junior or senior investigators.
- The Contact PI must be a junior investigator or a senior faculty member entering a new area of clinical or translational research, as noted in eligibility requirement #2 above.
- If a Multi-PI is a senior investigator, then this individual could also be a mentor for the project.
- Multi-PIs cannot hold funding from a COBRE project or another IDeA mechanism of support at the same time as Advance-CTR Pilot Project funding.

Questions regarding applicant eligibility should be emailed to AdvanceRI@brown.edu.

OVERVIEW

Advance-CTR

The aim of Advance-CTR is to support both the infrastructure development and resources required to conduct clinical and translational research in Rhode Island in order to enhance collaboration and coordination of state-wide clinical and translational research activities. Advance-CTR seeks to connect researchers and support institutions across Rhode Island with the common goal of advancing clinical and translational research that is responsive to Rhode Island's community health priorities. Through its interdisciplinary model, Advance-CTR supports research along the translational science spectrum, including basic science, clinical, and public health efforts, to improve the health of Rhode Island residents.

Advance-CTR Pilot Projects Program

The Advance-CTR Pilot Projects Program seeks to identify talented young investigators who are new to clinical and translational research and based at Brown University, University of Rhode Island, an affiliated health care system (Lifespan, Care New England, Providence VAMC), or another degree-granting institution in Rhode Island. The Pilot Projects Program also aims to support new collaborations among investigators. Pilot projects will be funded for one year, with the potential for a competitive renewal for a second year of funding.

For the purpose of this Program, clinical and translational research are defined below:

Clinical research comprises research with human subjects that is:

- Patient-oriented research. Research conducted with human subjects (or on material of human origin such as tissues, specimens, and cognitive phenomena) for which an investigator directly interacts with human subjects. Excluded from this definition are *in vitro* studies that utilize human tissues that cannot be linked to a living individual.
- Epidemiological and behavioral studies.
- Outcomes research and health services research.

Translational research aims to convert basic research advances to practical applications in humans and/or research aimed at the adoption of best practices in community health care.

Funding Available

The 2021 Pilot Projects Program will fund five to eight pilot projects for one-year research grants. Indirect costs associated with the direct costs will be provided to the applicants' home institutions.

Category 1: Proposals with a single PI may apply for up to \$37,500 direct costs.

Category 2: Proposals involving at least two PIs (e.g., Multi-PI's) from different disciplines may apply for up to \$75,000 direct costs. A Contact PI who is a junior investigator or a senior faculty member transitioning to a new area of clinical or translational research must be designated.

Performance Period

The anticipated performance period is 02/01/2022 to 01/30/2023.

Available Services for Applicants

All applicants are **strongly encouraged** to schedule a consultation with the Advance-CTR Service Cores (Biostatistics and Research Design, Biomedical Informatics, and Community Engagement and Outreach) to enhance their responsiveness to this RFA. Applicants are encouraged to review the available services on the [Advance-CTR website](#) and [submit service a request](#) to schedule a consultation.

Special Considerations

While the best science will be prioritized, special consideration will be given to fund two projects that incorporate community engagement into the proposed research. For the purpose of the Pilot Projects Program, Advance-CTR utilizes the [CDC-supported definition of community engagement](#):

Community engagement is the process of working collaboratively with and through groups of people affiliated by geographic proximity, special interest, or similar situations to address issues affecting the well-being of those people.

Coaching for such applicants will be available from Advance-CTR's Community Engagement and Outreach Core.

In addition, special consideration, in no particular order, will be given to investigators who:

1. Pursue research that addresses the health goals and priorities set forth by the Rhode Island Department of Health's [Strategic Framework](#). Priority areas (in no particular order) include, but are not limited to:

- Access to healthcare services especially among underserved populations including Latinx
 - Mental health in adults and youth - including prevention, services, programs, community resources and related stigma
 - Food access and nutrition
 - General community well-being, health awareness and improvement of community health resources
 - COVID-19
 - Chronic illnesses (e.g., diabetes, heart disease, asthma, cancer)
 - Substance use disorder
 - Obesity
 - Health of mothers and their children
2. Work on clinical or translational research involving big data. For this RFA, big data are defined as:

Big data are data that meet at least two of the four V's: (1) high **volume**, (2) high **velocity**, (3) high **variety**, and (4) face **veracity** issues.
 3. Employ robust use of [Advance-CTR Service Cores](#).
 4. **Physician-scientists** defined as scientists with professional degrees who have training in clinical care and who are engaged in independent biomedical research
 5. Are from historically underrepresented groups (these include those who self-identify as American Indian, Alaska Native, African American or Black, Hispanic or Latinx, and Native Hawaiian or Other Pacific Islander. These groups as well as women in the STEM fields of science, technology, engineering and mathematics have been identified by the U.S. Department of Education as groups that continue to have limited participation at the faculty levels in higher education).

AWARDEE AND MENTOR RESPONSIBILITIES

Investigators and mentor(s) will be expected to meet on a regular, pre-specified basis to review progress and the goals of the application. A mentorship plan must be established and submitted with the mentor'(s)' letter of support at the time of application. The mentorship plan should address:

- A mentor agreement that specifies the frequency and method (eg: by Zoom, in-person meetings, email, etc) of mentor-mentee communication and check-ins to ensure timely completion of the project and any relevant training.
- How the training plan supports the proposed research.

Awardee Responsibilities

Investigators selected for a Pilot Project award will be required to:

1. Obtain IRB and IACUC approval, as applicable, before funding can be awarded, no later than **January 3, 2022**. Applicants are strongly encouraged to have these processes underway at the time of preliminary application.
2. Present a seminar describing the project and progress/results at an [Advance-CTR Seminar Series](#) as well as, if invited, at the Advance-CTR External Advisory Committee Meeting.
3. Present a poster at the RI NIH IDeA Symposium and a talk, if invited.
4. Complete FCOI assurance and training as detailed under their respective organization's policy.
5. Attend all required program-related seminars and conferences (to be specified).
6. Attend monthly check-ins with the Advance-CTR Project Manager.
7. Complete quarterly progress reports based on the Advance-CTR grant year.
8. Complete a formal year-end report within one month of funding end.
9. Complete a participant evaluation survey at the end of the funding year.
10. Acknowledge sponsorship from Advance-CTR supported by the IDeA-CTR grant (U54GM115677) in all research publications during the performance period. Future publications related to this research must also [acknowledge Advance-CTR sponsorship](#).
11. Report all presentations, publications, and extramural funding that arise from this award to Advance-CTR.

12. Maintain updated Researchers@Brown profiles if Brown University-affiliated.
13. Acquire ORCID identifiers.
14. Utilize Advance-CTR Service Core(s) as outlined in the provided Letter of Support(s) and/or request use of services per each Core's policy, as appropriate.
15. Respond to Advance-CTR queries for information after the grant ends.

Mentor Responsibilities

Mentors will be required to provide the awarded investigators with research guidance toward an independent research career through a planned series of meetings and activities as well as frequent discussions and guidance as needed. Mentors are also expected to complete the [Advance-CTR Mentoring Training Program](#) upon funding of the proposal (if a mentor has already completed the training, please upload the certificate under "Additional Documents" when submitting a preliminary application or full proposal).

APPLICATION INSTRUCTIONS

To apply for a Pilot Project award, investigators must first submit a Preliminary Application to Advance-CTR. Selected applicants will then be invited to submit full proposals.

Preliminary Application Submission Instructions

Prospective applicants must submit a Preliminary Application through the [UFunds online portal](#) no later than **Tuesday, September 14, 2021 at 5pm ET**.

Non-Brown applicants must request access to UFunds. To do so, please email AdvanceRI@brown.edu no later than **Tuesday, August 31, 2021**.

The Preliminary Application must include the following:

1. Contact and academic information as requested via the UFunds application page.
2. Indication of the award category to which the investigator is applying.
3. Structured one-page overview of research aims, significance, and approach.
4. References.
5. NIH-formatted biosketch for each investigator and mentor.
6. Letter from Department Chair(s) stating postdoctoral fellow or resident physician applicants will have a faculty appointment by **January 3, 2022**, if awarded (not required for current faculty)

Preliminary Applications will be reviewed according to criteria outlined in the [Review Process and Selection Criteria](#) section below. Applicants will be notified on or around **Monday, October 4, 2021** if they are invited to submit a full proposal.

Additional guidance for preparing a Preliminary Application is available on the Advance-CTR website:

- [8 Elements of a Successful Preliminary Application](#)
- [Tips for Preparing Your Preliminary Application](#)
- [Examples of Successful Preliminary Applications](#) (Please note: These are examples only, and are not intended to serve as templates)

Advance-CTR leadership are available to speak with applicants about how to strengthen a preliminary application. Please contact AdvanceRI@brown.edu no later than **Tuesday, August 31, 2021** to schedule a conversation.

Full Proposal Submission Instructions

Full proposals are due through [UFunds](#) no later than **Monday, November 8, 2021 at 5pm ET**. Advance-CTR will not consider incomplete applications. Complete applications must include the following sections:

[Proposal Content](#)

Face Page: ([PHS 398 Form Page 1](#))

The Face Page should include Contact PI name, academic title, institution, address, title of project, and the name of the institutional grant management official. (Note: This form does **not** need to be signed by an institutional official at the time of submission.)

Project Summary, NIH Page 2: ([PHS 398 Form Page 2](#))

The Project Summary should be a succinct and accurate description of the proposed work. State the application's broad, long-term objectives and specific aims, making reference to the health relatedness of the project. Concisely describe the research design and methods for achieving the stated goals. The summary should be informative to other persons working in the same or related fields and, insofar as possible, understandable to a scientifically or technically literate reader. Avoid describing past accomplishments and the use of first person.

Additionally, the following sections of the Project Summary form should be completed:

- *Relevance:* Describe the relevance of this research to public health. Be succinct (using no more than two or three sentences) and use plain language that can be understood by a general, lay audience.
- *Project/Performance Site Primary Location:* Include the information pertinent to the contact PI's home institution.
- *Additional Project/Performance Site Location:* Include the information pertaining to any additional performance sites. If more than two performance sites will be used, list additional sites on the [PHS 398 Project/Performance Site Format Page](#).
- *Senior/ Key Personnel:* Include the Contact PI, multi-PI's (if Category 2), and mentor(s) for the project. Anyone listed in Senior/ Key Personnel must include a [biosketch](#) in the application.

Budget: ([PHS 398 Form Page 4](#))

The anticipated budget period is 02/01/2022 to 1/30/2023. **A separate budget must be submitted for each institution requesting support.** Together, the budgets must total no more than \$37,500 direct costs for Category 1 applications and \$75,000 direct costs for Category 2 applications. Advance-CTR will provide the indirect costs associated with the direct costs of each budget to the home institution(s).

PI salary is allowed, but will be reviewed carefully considering the scope of PI roles. Investigators providing effort without salary support are considered cost shared and must obtain a letter from an authorized organizational official (e.g., Director of Sponsored Projects Office) approving the cost share. Please reference the [Letters of Support](#) section below.

The below guidelines should be used to complete the PHS 398 budget form for each institution involved:

- *Personnel:* Indicate the investigator's name on the "PD/PI" line, number of calendar months dedicated to the proposed research, institutional base salary, requested salary, and associated fringe benefits. Investigators not receiving salary support should still be listed in the budget with effort indicated.
 - Please note: Funds cannot be used for graduate student or postdoctoral stipends, however salary is allowable.
- *Consultant Costs:* If consultant costs are budgeted, include the consultant's rate and total costs.
- *Equipment:* Equipment (durable items valued at \$5,000+) are *not allowed* for this award.
- *Supplies:* Allowable supply costs include computer software necessary for the project, laboratory supplies and services, animal and per diem housing expenses, publication costs, and participant stipends. General office supplies are *not allowed* for this award.
- *Travel:* Up to \$2,000 can be budgeted for travel related to research performance or dissemination of results.
- *Inpatient Care Costs:* Indicate costs related to proposed research, if any.
- *Outpatient Care Costs:* Indicate costs related to proposed research, if any.
- *Other Expenses:* List any other costs itemized by category, if any.

- **Consortium/Contractual Costs:** Include consortium or contractual costs required to accomplish the proposed research, if any.

Salary support for mentors is not allowed, unless the mentor is a Multi-PI on a Category 2 project and in a faculty track deemed allowable for support, as outlined above.

Support costs will be covered by Advance-CTR as resources are available. [Submit a service request](#) for inquiries regarding available services.

Budget Justification: ([PHS 398 Continuation Format Page](#))

Provide detailed justifications for all items requested in the budget(s). Separate justifications must be submitted **for each institution** requesting support.

Biographical Sketch (5-page maximum): ([Biographical Sketch Format Page](#), [Instructions](#) and [Sample](#))

A NIH-formatted biosketch is required for each investigator and mentor. If you do not have an eRA Commons user name, you must obtain one to include in the biosketch. Biosketches should not exceed 5 pages.

The personal statement in the biosketch should briefly describe why your experience and qualifications make you particularly well-suited for a Pilot Project award. In the Research Funding section, include other grant support and explain the relationship of each grant to the proposed project, including any scientific or budgetary overlap. Please adhere to the NIH guidelines for your biographical sketch.

Resources: ([PHS 398 Resources Format page](#))

Describe space, equipment, and other facilities available for the applicants to accomplish this research project. The Resources Format page must be completed for each Performance Site listed on PHS 398 Form Page 2.

Checklist: ([PHS 398 Checklist Form Page](#))

Complete **Section 3 only**, “Facilities and Administrative Costs” using the home institution’s F&A rate.

Research Plan (6-page maximum): ([PHS 398 Continuation Format Page](#))

The format of the Research Plan should follow the outline below exactly. Begin each section of the Research Plan with a section header (e.g., Specific Aims, Significance, etc.).

- **Specific aims:** Describe the goals and objectives of the research project (up to 1 page).
- **Significance:** Include overall significance of the project, including the previous research in the area and relevance to health care needs in Rhode Island (up to 0.5 page).
- **Innovation:** Describe both the conceptual and technical innovation of the proposed project (up to 0.5 page).
- **Approach:** Describe the experimental design and methods, including an appropriate analysis plan. Present preliminary data if available (up to 3.5 pages).
 - Up to 0.5 page of the 3.5-page approach should focus on detailing the statistical analysis plan for the proposed project.
- **Timeline:** Include approximate completion dates for the defined specific aims and [above outlined awardee responsibilities](#) (up to 0.5 page).

References

Provide a bibliography of any references cited in the Research Plan.

Multiple PD/PI Leadership Plan: ([PHS 398 Continuation Format Page](#))

A multi-PI plan must be included; it should describe the role of each of the PI’s. Investigators may find it helpful to consider the following elements in their plan for collaboration and include those that are relevant to their proposed project:

- Data collection
- Data analysis
- Communication
- Conflict resolution

- Authorship
- Responsibility for regulatory oversight (IRB/IACUC, etc.)
- Responsibility for financial oversight
- Training/supervision of technicians/assistants/trainees
- Change in institution
- Plans for intellectual property resulting from the project

Refer to [Section 5.5.7 PHS 398 Instructions](#). Do not exceed 0.5 page.

Future Funding Plans (500-word maximum, submitted in UFunds)

Describe plans to submit applications for future funding. This response should not be uploaded, but submitted via the appropriate UFunds query field.

The below table summarizes required proposal content outlined in this section:

Section	Description	Limits
Face Page	Provide the requested administrative information.	n/a
Project Summary	Complete the Project Summary, Relevance, Project/Performance Site Primary Location, and Senior Key Personnel.	n/a
Budget	Complete Page 4 of the NIH 398 form for each institution requesting support.	n/a
Budget Justification	Provide clear, succinct justification for each requested budget item for each institution requesting support.	n/a
Biographical Sketches	Include for all proposed key personnel, including mentors.	5 pages (each)
Resources	Detail space, equipment, and other resources available for research.	n/a
Checklist	Complete Section 3 of PHS 398 Resources Format page.	n/a
Research Plan		6 pages
Specific Aims	Project specific aims.	1 page
Significance	Overall significance of the project, including pertinent background information, previous research in the area, and relevance to health care needs in Rhode Island.	0.5 page
Innovation	Outline both conceptual and technical innovation.	0.5 page
Approach	Preliminary data* and research plan, including expected results, alternative approaches, and analysis plan. Include discussion of scientific rigor and biological variables. (Note: up to 0.5 page should focus on detailing the statistical analysis plan for the proposed project.)	3.5 pages
Timeline	Indicate dates for completion of Specific Aims, manuscript submission, and extramural grant applications submission.	0.5 page
References	Provide citations for any references used in the Research Plan.	n/a
Multiple PI Leadership Plan	Describe the role of each Multi-PI and plans for collaboration.	0.5 page
Future Funding Plans	Describe plans to submit application for future funding.	500 words

*Preliminary data are encouraged, but not required.

Regulatory Information

Be sure to address the Human Subjects, Vertebrate Animals, and Biosafety/Safety Agents sections as described below. Be sure to indicate the IRB and IACUC approvals or status as applicable to your proposed research. Human Subjects education certification(s) must be up-to-date and available upon request for all personnel involved in the conduct of human subjects research.

Human Subjects and Clinical Trial Information

The [Advance-CTR Human Subjects and Clinical Trial Information Form](#) must be completed for ALL projects.

Non-Human Subjects projects are required to complete the Advance-CTR Human Subjects and Clinical Trial Information Form, items i.- iii.

Human Subjects projects must include:

- The Advance-CTR Human Subjects and Clinical Trial Information Form and associated Study Record. Complete the form using the built-in instructions.
- The [Advance-CTR Enrollment Report form](#) following [NIH instructions](#).

To determine whether human subjects are involved, complete the "[Am I doing Human Subjects Research?](#)" [Questionnaire](#). To help identify whether research that involves the use of human data or biological specimens is human subjects research, refer to this [flowchart](#).

Vertebrate Animals Section

Refer to [Vertebrate Animals NIH Instructions](#) and the [Worksheet for Applications Involving Animals](#). If vertebrate animals are involved, address each point below. Provide a concise, complete description of the animals and proposed procedures. While additional details may be included in the Research Plan, the responses to the four required points must be cohesive and include sufficient detail.

If all or part of the proposed research involving vertebrate animals will take place at alternate sites (such as project/performance or collaborating site(s)), identify those sites and describe the activities at those locations.

Although no specific page limitation applies to this section, be succinct. Failure to address the following four points will result in the application being designated as incomplete and will be grounds for NIGMS to defer approval of the application. The three points are as follows:

1. **Description of Procedures:** Provide a concise description of the proposed procedures to be used that involve vertebrate animals in the work outlined in the "Research Plan" attachment. Identify the species, strains, ages, sex, and total numbers of animals by species, to be used in the proposed work. If dogs or cats are proposed, provide the source of the animals.
2. **Justifications:** Provide justification that the species are appropriate for the proposed research. Explain why the research goals cannot be accomplished using an alternative model (e.g. computational, human, invertebrate, in vitro).
3. **Minimization of Pain and Distress:** Describe the interventions including analgesia, anesthesia, sedation, palliative care and humane endpoints that will be used to minimize discomfort, distress, pain, and injury.
4. **Method of Euthanasia:** Provide a justification for methods of euthanasia that are consistent with the American Veterinary Medical Association (AVMA) Guidelines for the Euthanasia of Animals. If answer is "No" to the question "Is method consistent with AVMA guidelines?", describe the method and provide scientific justification in the text field provided.

Do not use the vertebrate animal section to circumvent the page limits of the Research Plan.

Biosafety/Select Agents

Refer to [Select Agents NIH Instructions](#). Indicate Institutional Safety Committee approvals.

Letters of Support

1. **Research Administration:** If the Contact PI or a Multi-PI is **not employed by Brown University**, a signed Letter of Intent (LOI) from the Contact PI and/or Multi-PI's office of research administration must be included. If the Contact PI/Multi-PI is not receiving salary support, the LOI(s) must explicitly approve of the cost share and list the dollar amount of the cost share.
2. **Department Chair(s):** Letter(s) from the Department Chair(s) and/or supervisor(s) **for each investigator** documenting the Investigator name and title along with availability of protected time for research must be included. If a Brown University PI is not receiving salary support, the letter must explicitly approve cost share and list the dollar amount of the cost share.

3. Mentor(s): Letter(s) from the mentor(s) agreeing to advise on the conduct of the proposed research and describing plans for mentoring the junior investigator(s) must be included with the application.
4. Advance-CTR Consultation(s): Applicants who consult with the Advance-CTR Service Cores must include a letter of support from the Core(s).

Summary Statement Response (if applicable)

Applicants who are re-submitting a proposal from a prior Advance-CTR Pilot Projects Program must provide a one-page response (maximum) to the summary statement they received. Please detail how you addressed all previous concerns in your application.

Additionally, please upload the summary statement to UFunds.

Applications with any missing components will be considered incomplete and will be withdrawn without review.

APPLICATION FORMAT

Applications should follow an abbreviated NIH format with minor modifications. This application requires the use of the most recent version of the [PHS 398 Forms](#).

Font: Arial, Helvetica, Palatino Linotype or Georgia typeface and a font size of 11 points or larger must be used. A Symbol font may be used to insert Greek letters or special characters; the font size requirement still applies. A smaller font size may be used for figures, graphs, diagrams, charts, tables, figure legends, and footnotes, but this type must follow the font typeface requirement and be readily legible.

Margins: Margins should be 0.5 inch.

REVIEW PROCESS AND SELECTION CRITERIA

Preliminary Applications

Reviews of Preliminary Applications will be conducted by the Advance-CTR Pilot Projects Program Steering Committee.

Reviews of Preliminary Applications will focus on:

1. Responsiveness to [eligibility requirements](#) and [program goals](#).
2. [Special considerations](#).
3. Feasibility of the proposed research.

Full Applications

Reviewers of the full applications will include the Steering Committee and others who have content area or methods expertise relevant to the individual proposals. All reviewers will be highly qualified faculty from Brown University, University of Rhode Island, and/or affiliated hospitals. Final selections will be made by a Council comprised of Advance-CTR leadership with approval of the Advance-CTR Steering Committee.

Applications will be reviewed using the following criteria:

1. Responsiveness to the RFA, including the relevance to RI health priorities and the clinical or translational nature of the research.
2. Scientific impact and soundness of the experimental design, including plans for data analysis.
3. Technical and conceptual innovation.
4. Training and expertise of the (Multi-) PI's and their ability to perform the proposed research.
5. Scientific and mentoring expertise of the mentor(s).
6. Project environment, including facilities and adequacy of the patient population, if applicable.

7. Reasonable and justified budget that is appropriate for the proposed research.
8. Likelihood that the project will lead to external funding.

Funding is dependent upon final review and approval by the Advance-CTR External Advisory Committee and by NIGMS.

Since NIGMS requires IACUC and IRB approval PRIOR to funding, applicants are strongly urged to have commenced the regulatory approval process(es) at the time of submission of the preliminary application. IRB and IACUC approvals must be obtained by January 3, 2022 or applicants risk loss of funding.

DATES AND DEADLINES

Tuesday, August 31, 2021:	Last day to schedule calls with leadership
Tuesday, September 14, 2021:	Preliminary Applications due
Monday, October 4, 2021:	Selected applicants invited to submit a Full Proposal
Monday, November 8, 2021:	Full Proposals due
Monday, December 20, 2021:	Pilot Awards recommended for funding (anticipated)
Monday, January 3, 2022	All Just in time materials (IRB, IACUC, IBC approvals) completed
Tuesday, February 01, 2022:	Pilot funding begins (anticipated)

QUESTIONS

Please email AdvanceRI@brown.edu with any questions about the Pilot Projects Program or review process.

Reponses to all questions will be posted on [the FAQ page](#) of the [Advance-CTR website](#).
